

PRIMARY AND SECONDARY PROCESSING OF ECOSAN BY-PRODUCTS

REMEMBER TO WASH HANDS WITH SOAP AFTER EVERY TOILET USE

Place leaves at the bottom of the pit before use to avoid faecal matter sticking on the floor of pit

PRIMARY PROCESSING

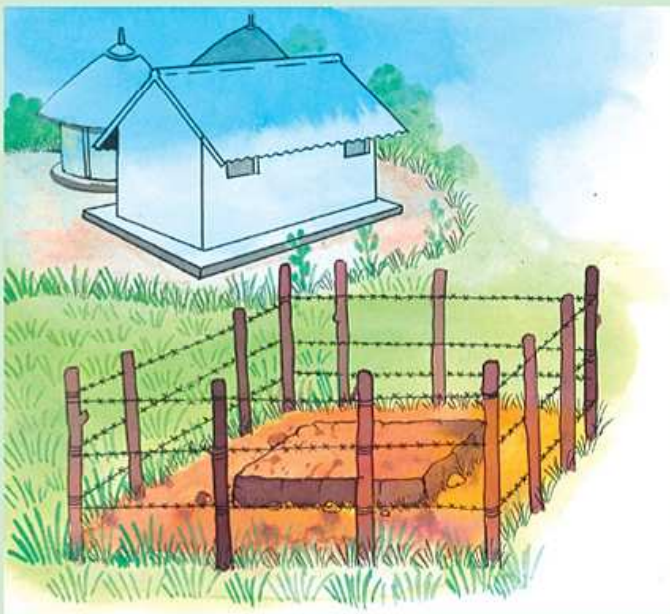

Add a good amount of soil, ash, dry leaves after use to provide environment for breakdown of organisms

After 12 months empty compost from pit one

Gather green leaves, food waste, peelings, garden refuse, rotten fruits and mix with compost

After mixing compost burry for three weeks. Fence off to ensure no access by children

Turn compost inside out every ten days to ensure uniform decomposing

Secondary composting by incineration
